Art Unit: 2634

#### **DETAILED ACTION**

### **Drawings**

- 1. Figure 1A, 1B, and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
- 2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "the memory element, and processor" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Specification

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/050,399 Page 3

Art Unit: 2634

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1, 18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by or, in the alternative under 35 U.S.C. 103(a) as obvious over Ling et al. (US Patent 6,377,607 B1).
- (1) With regard to claim 1, Ling et al. discloses in Fig. 5, an apparatus (96) for determining likelihood values of input data bits from a plurality of code symbols and a plurality of pilot symbols, comprising: a memory element; and a processor configured to execute a set of instructions stored in the memory element, the set of instructions for: determining a gain vector relating the plurality of code symbols and the plurality of pilot symbols in accordance with channel characteristics (100); and using the gain vector to determine likelihood values of a designated code symbol, wherein the input data bits are carried by the designated code symbol (col. 17, lines 40-col. 18, lines 1-6).
  - (2) With regard to claim 18, claim 18 inherits all limitations of claim 1.
  - (3) With regard to claim 20, claim 20 inherits all limitations of claims 1 and 18.

### Allowable Subject Matter

6. Claims 17 and 19 are allowed.

Application/Control Number: 10/050,399

Art Unit: 2634

7. Claims 2-16 are objected to as being dependent upon a rejected base claim, but would be

allowable if rewritten in independent form including all of the limitations of the base claim and

any intervening claims.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Lawrence B Williams whose telephone number is 703-305-6969.

The examiner can normally be reached on Monday-Friday (8:00-5:00) being out of the office

every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Stephen Chin can be reached on 703-305-4714. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-872-9306 for regular

communications and 703-872-9306 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-305-4750.

Lawrence B. Williams
